

# Just Wax launches professional heater system

6 July 2010 | By Augusta Anthony

**Just Wax has launched a professional heater that aims to provide flexibility for multiple waxes by allowing the therapist to interchange.**

Heaters are available as stand-alone for salons but are compact enough for the mobile therapist.

Also available is a wide range of waxes, including the Tea Tree System. This product incorporates the natural antiseptic as well as skin soothing lavender in a pre-wax gel and after-wax oil. Just Wax also offers products for more sensitive areas and a pre-wax cleanser to prepare the skin.

Finally, Just Wax stocks a fully portable roller system with available refills and antiseptic head cleaner. The Just Wax product range offers a full range of waxing products. Their professional waxing system provides expert products that are widely available online and by order through beauty retailers.
